Welcome

The **ISFEH** is a long-standing tradition that brings together distinguished researchers from around the world. Since 1995, the ISFEH has successfully been held in Moscow (1995, 1997), Lake Windermere (2000), Londonderry (2003), Edinburgh (2007), Leeds (2010), Providence (2013), Hefei (2016), St. Petersburg (2019), and Oslo (2022).

In 2025 the Eleventh International Seminar on Fire and Explosion Hazards (ISFEH 11) is hosted by the **Faculty of Civil and Industrial Engineering at Sapienza University of Rome**.

This is the 30th anniversary of the ISFEH and we look forward to celebrating this milestone with you!

The 11th ISFEH will include invited lectures from leading researchers in the field and presentations of peer-reviewed papers.

The International Seminar on Fire and Explosion Hazards (ISFEH) is a great opportunity for Companies to meet in presence all participants who will attend the Symposium presenting new reserches, exchanging information and discussing current issues in the broad areas of fire and explosion research, mitigation and prevention.

In addition to the scientific programme, Rome offers an ideal setting with countless popular attractions and hidden gems.

Therefore, ***we invite you to be part of the 11th ISFEH and to consider your support through one of the opportunities listed in this prospectus !***

ROME (ITALY)
June 15 - 20, 2025

SAPIENZA
UNIVERSITÀ DI ROMA

CHAIR: Paola Russo, *Sapienza University of Rome*

VENUE: Faculty of Civil and Industrial Engineering, *Sapienza University of Rome, Italy*

Topics

The Seminar will be focused on the following topics:

- Fundamentals of fires and explosions
- Deflagration, DDT, detonation, and their mitigation
- Two-phase explosions
- Hydrogen safety
- Battery safety
- Industrial risk and sustainability
- Material flammability and flame retardancy
- Fire suppression and mitigation systems
- Combustion in extra-ordinal environment (e.g microgravity, high-pressure)
- Fire and explosion modelling and computer codes
- Critical and transient combustion phenomena (ignition, extinction, flame spread)
- Industry-specific fire and explosion research: renewable energy, aerospace, oil and gas, nuclear, process industry
- Wildland fires
- Fire toxicity and pollutants
- Evacuation
